

## BIBLIOBOARD COMMUNITY E-BOOK COLLECTIONS

BiblioLabs has worked with a number of publishers to provide unlimited, simultaneous use content to patrons. These content sets are available for purchase by publisher on a collection-by-collection basis but are best applied as community ebook collections to support library programming & outreach. The delivery on BiblioBoard also helps you conceive and market community wide ebook initiatives that appeal to community members not currently using digital resources in the library. We will work with you to analyze usage data throughout the state and maximize usage and impact of these materials.

Below is our Diversity e-Book Collection. For the outlined collection, we have provided the total number of books and the collection price for a Wisconsin statewide purchase. Subscription prices shown are for 1 year of access. The perpetual ownership purchase price for these will be 5X the subscription price. We will provide preservation files if you purchase perpetually.
